The perfect solution for:

Domestic Homes Multi Occupancy Apartments Private Landlords

The Atlantic Accessio electric radiator contains specially formulated thermal oil fluid that delivers fast homogeneous long-lasting heat because of our integral ThermoFluid technology.

Designed with a modern cosmetic appearance the Atlantic Accessio electric radiator is compact meaning it is perfect for fitting into rooms with small walls. Due to the thermal fluid technology, the Atlantic Accessio electric radiator is silent making it the perfect appliance to be fitted into living rooms and bedrooms.

Equipped with user-friendly digital heating controls and a high-precision thermostat and with open window detection as well as manual and 24-hour programming capabilities. The Accessio electric radiator offers users energy savings of up to 25% when compared to conventional electric heating solutions.

The Accessio has been designed to be easy to install with its H-shaped vertical support meaning you can install high volumes of the Accessio electric radiator with ease.
